UNDERSTANDING THE SHOP OWNER'S JOURNEY

1 WHY WAS JEWELDESK CREATED?

Running a jewellery shop involves much more than just selling jewellery. Every day, shop owners need to manage ornaments in trays, calculate prices based on shifting metal rates, prepare customer bills, maintain customer records, track payments, and understand their shop's financial performance.

When information is scattered across handwritten registers, loose paper slips, mental calculations, or disconnected spreadsheets, daily work can become time-consuming, tiring, and confusing for both the owner and showroom staff.

JewelDesk was created to help jewellery retailers manage their everyday business activities in a more organized and convenient way.

THE SIMPLE EXPLANATION

2 WHAT IS JEWELDESK?

JewelDesk is jewellery retail management software that brings important shop-management activities together in one place. Instead of managing business records separately across multiple registers, you can use JewelDesk to organize your inventory, record sales transactions, maintain customer details, and view useful business reports.

In simple words: JewelDesk helps you keep your jewellery business organized and gives you a clearer view of your shop's daily activities.

THE 4 CORE PILLARS OF DAILY SHOP MANAGEMENT

Pillar 1 Organized Stock

Record every jewellery piece with its category, metal, gross weight, net weight, purity, and hallmark identification.

Pillar 2 Smooth Counter Sales

Select items quickly, apply the day's metal rate and making charges transparently, and generate clean invoices.

Pillar 3 Organized Customer Care

Save customer contact details and purchase histories so you can serve returning families with familiarity.

Pillar 4 Clear Business Visibility

Review sales summaries and stock movements date-wise to know exactly how your showroom is performing.

PRACTICAL SOLUTIONS FOR DAILY SHOP PROBLEMS

HOW CAN JEWELDESK HELP YOUR SHOP?

JewelDesk was designed around the actual daily rhythm of a jewellery showroom. Here is how it addresses everyday shop challenges:

01

Manage Your Jewellery Stock

INVENTORY

EVERYDAY PROBLEM:

Searching through trays and notebooks to find piece details or verify actual stock is slow and stressful during customer rush.

HOW JEWELDESK HELPS:

Keep your inventory organized and find item details more easily. Get a clearer view of the stock recorded in your system, including gross weight, net weight, purity (22K, 18K, 14K), and item category.

02

Record Sales Easily

POINT OF SALE

EVERYDAY PROBLEM:

Calculating making charges, metal prices, and tax manually on paper bills can cause arithmetic errors and slow down the billing counter.

HOW JEWELDESK HELPS:

Maintain sales records in one place and make it easier to review previous transactions. Select items, apply rates, and generate clean, printed tax invoices quickly.

03

Track Gold and Silver Rates

DAILY BULLION

EVERYDAY PROBLEM:

Metal rates change regularly; staff members can sometimes quote inconsistent rates to walk-in customers.

HOW JEWELDESK HELPS:

View gold and silver rate information available in the software to support your daily business workflow. Enter your daily board rates so calculations at the counter remain uniform and transparent.

04

Maintain Jewellery Identity Details (HUID)

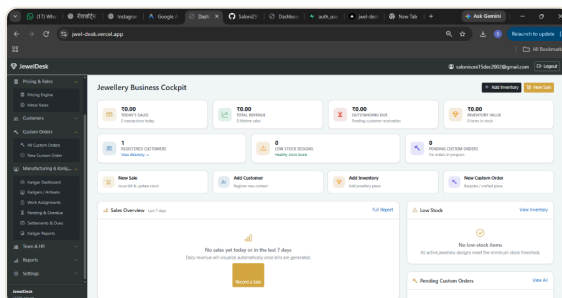

HALLMARK TRACKING

EVERYDAY PROBLEM:

Tracking 6-character Hallmark Unique Identification (HUID) codes and purity tags on paper is tedious and easy to mix up.

HOW JEWELDESK HELPS:

Organize supported jewellery identification details, including HUID information, where applicable. Record and review HUID numbers directly alongside item weights on printed invoices.

Actual Screen: Organized Jewellery Inventory

Every ornament is clearly listed with item code, metal type, gross weight, net weight, purity karat, and hallmark HUID for effortless verification.

OPERATIONS, RECORDS & FOLLOW-UP

MORE WAYS JEWELDESK SUPPORTS YOUR SHOP

From tracking stock movements to keeping customer records organized and reviewing business reports:

05

Understand Stock Movement

AUDIT TRAIL

EVERYDAY PROBLEM:

It is difficult to know when an item entered stock, when it was sold, or whether a piece was adjusted or returned.

HOW JEWELDESK HELPS:

Review recorded stock movements to understand how inventory changes over time. Every purchase, sale, or return is tracked in a date-wise history.

06

View Business Reports

BUSINESS INSIGHTS

EVERYDAY PROBLEM:

Spending late evenings after closing manually adding up daily sales and category totals from registers requires hours of extra effort.

HOW JEWELDESK HELPS:

Use available reports to review sales and other recorded business information over selected periods without manually compiling everything from scratch.

07

Manage Payment Information

PAYMENT RECORDS

EVERYDAY PROBLEM:

Customers often pay using mixed modes—part cash, UPI transfer, and debit/credit card—making payment reconciliation confusing.

HOW JEWELDESK HELPS:

Keep relevant payment records organized and make it easier to review transaction details. Split payments across cash, card, UPI, and bank transfer are clearly recorded.

08

Keep Customer Records & WhatsApp Communication

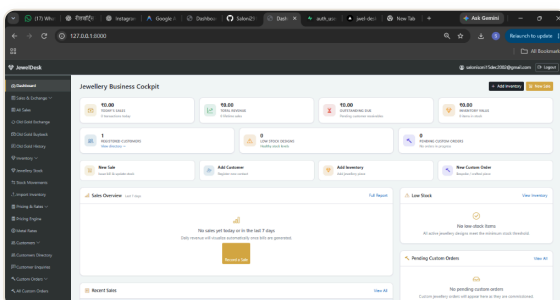

CUSTOMER CARE

EVERYDAY PROBLEM:

Customer contact details get lost in old diaries, and following up or sending a polite thank-you message after a sale is often forgotten.

HOW JEWELDESK HELPS:

Store and access customer information more conveniently instead of searching through scattered records. Use the available WhatsApp thank-you message feature to support customer follow-up after a sale.

Actual Screen: Daily Sales & Business Reports

Review recorded daily counters, payment collection breakdowns, and transaction summaries over chosen date ranges with just a few clicks.

SIDE-BY-SIDE COMPARISON

BEFORE JEWELDESK VS WITH JEWELDESK

See how transitioning from scattered paper records to an organized software system makes a practical difference in your daily shop routine:

✗ WITHOUT AN ORGANIZED SYSTEM

- Searching through records can take time when a customer asks about a previous purchase.
- Stock information may be difficult to review across multiple physical trays and registers.
- Sales and customer details may be scattered across handwritten notebooks and paper slips.
- Preparing reports can require extra effort and long manual calculations after showroom hours.

✓ WITH JEWELDESK

- Keep supported business information in one place, accessible whenever you need it.
- Find recorded inventory details more conveniently by item code, metal, or category.
- Review sales and customer records more easily from a unified billing screen.
- Access available reports without manually compiling everything from scattered papers.

** Note: JewelDesk is designed to support and assist shop staff by organizing recorded information; it does not eliminate all manual showroom care or promise error-free records.*

DESIGNED FOR YOUR NEEDS

WHO CAN BENEFIT FROM JEWELDESK?

JewelDesk is designed for jewellery retailers who want a more organized way to manage everyday shop activities, including:

Jewellery Shop Owners

Owners who want peace of mind knowing that inventory, daily sales, and transaction records are organized in one dependable system.

Independent Jewellery Retailers

Family-run and standalone jewellery retail shops looking to step up from physical paper registers to clean, professional digital records.

Shops Managing Inventory & Sales

Showrooms handling gold, silver, and gemstones that need quick weight lookups, accurate pricing, and printed tax invoices at the counter.

Retailers Seeking Better Visibility

Business owners who want a clear, day-to-day picture of their recorded stock levels, sales turnover, and customer histories.

THE TRUE VALUE OF JEWELDESK

**"LESS CONFUSION. BETTER ORGANIZATION.
A CLEARER VIEW OF YOUR BUSINESS."**

JewelDesk helps bring essential jewellery retail activities together so shop owners can spend less time searching through scattered information and more time focusing on customers and their business.

HOW JEWELDESK FITS INTO YOUR DAILY SHOP WORKFLOW

1

Set Up Daily Rates

Enter the morning gold and silver rates so your counter billing is always accurate and consistent.

2

Record Counter Sales

Select customer jewellery, apply making charges, split payments, and print clean tax invoices.

3

Review Daily Summary

Review daily sales summaries and customer records without late-night register calculations.

MAKE YOUR JEWELLERY BUSINESS EASIER TO MANAGE.
